

TERCIARIO (Eoceno)

Estado Zulia

Referencia original: G. A. Young, A. Bellizzia, H. H. Renz, F. M. Johnson, H. H. Renz, R. H. Robie y J. Masvall, 1956, fig. 41, junto p. 80.

Consideraciones históricas: Los miembros o arenas "C" (o CX), fueron establecidos originalmente por la Creole Petroleum Corporation, para definir la porción inferior del intervalo producto del Eoceno en el subsuelo del lago de Maracaibo, denominados "C-1-X" a "C-7-X" (posteriormente se suprimió la X). La referencia original corresponde a Young *et al.* (1956). Borger y Lenert (1959) y Young (1961), describieron brevemente dichas unidades. Originalmente se interpretaron las arenas "C", como equivalentes a la Formación Trujillo, en el subsuelo del lago, pero Brondjik (1967-a) y Walton (1967), al publicar las conclusiones del comité nombrado por la Asociación Venezolana de Geología, Minería y Petróleo para la revisión de la nomenclatura del Paleoceno y Eoceno de la cuenca de Maracaibo, establecieron definitivamente su correspondencia con la porción inferior de la Formación Misoa. La unidad informal Miembro (antes Formación) Concepción, del área Mara-La Paz, se considera equivalente a las Arenas "C".

[REGRESAR A LA PAGINA PRINCIPAL](#)

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations, 1999). The number of people aged 65 and over is projected to increase to 1.1 billion by the year 2050 (United Nations, 1999).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The World Health Organization (WHO) has developed a 'Global Strategy on Ageing and Health' (WHO, 1999) which aims to 'improve the health and well-being of older people and to ensure that they are able to live full and active lives'.

The WHO strategy is based on the following principles: (1) 'Older people should be able to live full and active lives'; (2) 'Older people should be able to live in their own homes and communities'; (3) 'Older people should be able to participate in social and cultural life'; (4) 'Older people should be able to live in a safe and secure environment'; (5) 'Older people should be able to live in a supportive environment'.
