

PRE - MESOZOICO

Distrito Federal

Aguerrevere y Zuloaga (1937) introducen el nombre de "Augen-gneiss de Peña de Mora", posteriormente Dengo (1951) la eleva al rango formacional. Urbani y Ostos (1989) en su redefinición de las rocas del macizo de El Avila recomiendan utilizar el nombre original de Augengneis de Peña de Mora, denominando a las rocas adyacente como Esquisto de San Julián, y ambas unidades como integrantes del Complejo Avila.

[REGRESAR A LA PAGINA PRINCIPAL](#)

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion (United Nations 1999). The number of children in the world who are under 5 years of age has increased by 0.5 billion in the same period. The number of children in the world who are under 15 years of age is projected to increase by 1.2 billion by the year 2020 (United Nations 1999).

There is a growing concern that the rapid increase in the number of children in the world is leading to a corresponding increase in the number of children who are living in poverty. This is because the number of children who are living in poverty has increased by 1.2 billion in the 1990s (United Nations 1999). The number of children who are living in poverty is projected to increase by 1.2 billion by the year 2020 (United Nations 1999).
