

Symbols used on geologic maps, economic maps, and mine plans

Geologic boundaries		Abandoned mine or quarry		
Inferred boundaries		Placer mine, surface mine		
Known fault		Abandoned placer or surface mine		
Probable on inferred fault		Prospect		
Concealed fault (covered by later deposits)		Mine pits		
Fault zone, shear zone		Mine dump		
Dip of fault plane		Drill hole		
Vertical fault		Inclined drill hole, showing direction		
Overthrust side of thrust fault		WATER WELLS		
Upheaved side of normal fault		Well, character not indicated		
Downdropped side of normal fault		Nonflowing well		
Strike and dip of bedding		Flowing well		
Strike of vertical strata		Unsuccessful or dry well		
Horizontal beds		Nonflowing well, with pumping plant		
Strike and dip of overturned beds		Flowing well, with pumping plant		
Prevailing dip of beds		Spring		
Strike and dip of chistosity		Thermal spring		
Strike of vertical schistosity		Mineral spring		
Strike and dip of joint planes		OIL AND GAS WELLS		
Strike of vertical joint planes		Site for test well		
Rock exposure without observed strike and dip		Location of well		
Rock exposure with observed strike and dip		Well being drilled		
Rock exposure with strike and dip of schistosity		Dry hole		
General dip of beds having subordinate folds		Dry hole, with show of oil		
Anticline with observed pitch		Dry hole, with show of gas		
Syncline with observed pitch		Dry hole, with show of oil and gas		
Axis of anticline		Oil well		
Axis of syncline		Oil well, with show of gas		
Axis of overturned anticline		Abandoned oil well		
Axis of overturned syncline		Abandoned oil well, with show of gas		
Axis of plunging anticline showing direction of pitch		Gas well		
Axis of plunging syncline showing direction of pitch		Gas well, with show of oil		
Glacial striae		Abandoned gas well		
Mine shaft		Abandoned gas well, with show of oil		
Inclined shaft		Oil and gas well		
Tunnel opening on maps of large scale		Abandoned oil and gas well		
Mine tunnels, showing direction		Oil tanks		
Raizes		COAL OUTCROP SYMBOLS (usually shown in color)		
Winzes		Coal outcrop (dotted line hypothetical)		
Mine workings		Exposure or bloom on coal outcrop		
Mines or quarries		Drift or slope on coal outcrop		

Tomado de: J. L. Ridgway, 1920. The preparation of illustrations for reports of the United States Geological Survey, Washington.
